#### **Position in the educational system**

*Main field of studies*

Food and Nutrition

Sport Science

*Specialization*

A1F, Second cycle, has second-cycle course/s as entry requirements

A1F, Second cycle, has second-cycle course/s as entry requirements

#### **Entry requirements**

Requirements for eligibility: IKA 401 Internship I, 15 higher education credits.

In addition, a plan and an agreement for the internship must be signed by the host organization and approved by the course leader. A supervisor at the place of internship and dates for the duration of internship should be specified. The field placement can be as per IKA 401 Internship I or at another location, in or outside Sweden, and at a university, or another work place or a non-profit organization. The planned activities should clearly relate to Food and Nutrition or Sport Science.

**Learning outcomes**

On successful completion of the course the student will be able to:

*Skills and abilities*

- monitor and describe new experiences related to Food and Nutrition/Sport Science.
- critically and constructively reflect on different approaches and work systems and methods applied in the host organization.
- use literature to discuss how theoretical concepts are used, and could be used, in the practice field.

*Judgement and approach*

- identify and discuss ethical dilemmas encountered during the internship.

**Course content**

This course is for students who wish to extend the internship offered through IKA 401 Internship I, or students who want to consider an additional career possibility. The course allows for further hands-on experiences in research or Food and Nutrition/Sport Science professions. Students describe and reflect on their experiences in written reports and an oral presentation.

Students are responsible for identifying, contacting and making arrangements with the work place. They should make contact with an on-site advisor within the host organization who can assist in formulating the intern's tasks and responsibilities. This plan must be approved by the course leader.

**Form of teaching**

The course consists of field practice in Food and Nutrition/Sport Science. During the internship, students will receive supervision by the department regarding reflection and reporting.

Swedish or English

**Assessment**

Assessment includes the completion of a) the planned total internship work hours of 350 to 450 (corresponds to 40 hours per week during 10 weeks), b) a final report, and c) an oral presentation. This report should build on the daily journal entries students are required to make during the internship. To verify that the internship is carried out, students must present a written confirmation from the host organisation signed by the

on-site supervisor.

If a student, who has failed the same examined component twice, wishes to change examiner before the next examination, a written application shall be sent to the department responsible for the course and shall be granted unless there are special reasons to the contrary (Chapter 6, Section 22 of Higher Education Ordinance).

In cases where a course has been discontinued or has undergone major changes, the student shall normally be guaranteed at least three examination occasions (including the ordinary examination) during a period of at least one year from the last time the course was given.

### **Grades**

The grading scale comprises: Pass with Distinction (VG), Pass (G) and Fail (U).

If the written report has the grade Pass with distinction, and all other requirements are fulfilled the grade for the entire course will be Pass with distinction.

### **Course evaluation**

The results of and possible changes to the course will be shared with students who participated in the evaluation and students who are starting the course.

### **Additional information**

Course literature: Students are required to search and read literature relevant to their internship work tasks (with approval from internship supervisor).
