DEPARTMENT OF APPLIED IT

TIA014 Governance and Control for Digital Capabilities, 15 credits

Styrning för digital förmåga, 15 hp

Second Cycle/ Avancerad nivå

The reading list was confirmed on 2018-11-23 to be valid from 2019-01-21.

The following 20 papers have been carefully selected as core reading for the course. The papers will be allocated to the different groups (se numbering) for each literature seminar, but you are recommended to read all regular papers. Additional readings are included for the ardent and industrious student(s) wanting to burrow deeper into the wonderful world of theory, conjecture and evidence. All papers are accessible online through your GU/Chalmers account, and we recommend Google Scholar as the premier source of access.

For each literature seminar, the groups are requested to hand in a summary of the selected paper (in pptx format), for distribution among your peers.

Seminar 1: Control

1. Cram, W.A., Broham, K. & Gallupe, R.B. (2016). Information systems control: a review and framework for emerging information systems processes. *Journal of the Association for Information Systems*, 17(4), p. 216-266.

Additional literature, to a lesser extent, may be added. If you have impaired reading, please contact the study counsellor at the Department of Applied Information Technology (studievagledning@ait.gu.se), so that we can plan possible additions with due regard to this.

If you have impaired reading, you can also contact the University Library for access to adapted course literature. Adapted course literature includes, for example, talking books, e textbooks or Braille. You must personally certify that your ability to read is impaired. The Swedish Agency for Accessible Media records and produces adapted course literature. It takes time to produce adapted course literature, so it is therefore important to contact the University Library in good time before the start of your course.
